OFFICE OF THE DIRECTOR

TREASURY DEPARTMENT  
BUREAU OF FEDERAL SUPPLY  
WASHINGTON 25

October 12, 1948

CIRCULAR LETTER B-3 REVISED

TO: Heads of Departments and Establishments

FROM: Clifton E. Mack, Director, Bureau of Federal Supply

SUBJECT: Supply Centers of the Bureau of Federal Supply

In addition to its operations in Washington, D. C., the Bureau of Federal Supply has Supply Centers with headquarters at New York, Cleveland, Chicago, Atlanta, Fort Worth, Kansas City, Denver, San Francisco, and Seattle. Also, Branch Supply Centers have been established at Boston and Los Angeles, which operate under the general supervision of the Supply Centers at New York and San Francisco, respectively.

Each of the Supply Centers is staffed to perform complete purchasing and contracting work and to issue supplies to all Federal agencies. The Branch Supply Centers at Boston and Los Angeles are primarily for the issuance of supplies from stock although they perform a limited amount of purchasing work.

Catalogs listing the items carried in stock are issued from time to time. These contain instructions regarding the use of the catalogs and the submission of requisitions or purchase orders to Supply Centers. Any of your field offices which do not have a copy of the current catalog may obtain one from the Manager of the appropriate Supply Center, or from the Deputy Director, Stores Branch, Bureau of Federal Supply, Treasury Department, Washington 25, D. C. A list of the present addresses of the Managers of Supply Centers is attached.

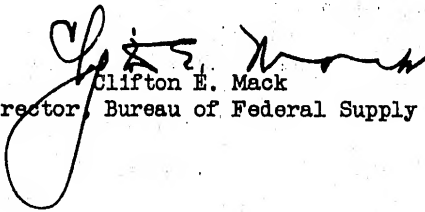

The stock catalog contains a map showing the area which generally can be served by freight or express more quickly or more economically from each of the Supply Centers than from any of the others. The areas delineated also apply in general to parcel post shipments, although the parcel post zoning system makes it possible to deliver material from more than one of the Supply Centers for the same delivery charge in many instances. This service area map is presented to assist requisitioning agencies. Agencies need not follow the map, but may choose the Supply Centers to which they will submit their requisitions.

The Bureau of Federal Supply will welcome recommendations with regard to items which are in common or sufficiently frequent use to warrant

carrying them in stock, and will be glad to receive suggestions with respect to other factors which it is believed will improve the service of the Supply Centers so that they may render the greatest possible assistance to Federal agencies in meeting their supply requirements.

# STOCK CATALOG

BUREAU OF FEDERAL SUPPLY

**Washington, D.C., Supplement**

Items listed herein do not appear in this Bureau's General Stock Catalog

July 1948

## FOREWORD

This Catalog Supplement contains stock items which are not listed in this Bureau's General Stock Catalog. The items herein described are "special" articles carried primarily for accommodation of agencies in the Washington service area.

For ordering procedures, please consult our General Stock Catalog, which covers the standard items carried at all Supply Centers.

## REMINDERS

Requisitions, orders, or purchase authorities for **STOCK ITEMS** should be forwarded, in duplicate, to Treasury Department, Bureau of Federal Supply, **STOCK CONTROL SECTION**, Room 4130, 7th and D Streets, S.W., Washington 25, D. C.

Prices in this Supplement are subject to change without notice. Consult our quarterly price lists for encumbrance of all requisitions for stock items placed with this Supply Center.

Slight changes in quantity may be made when filling requisitions to permit issues in original containers unless the requisition specifically restricts the quantity to be furnished.

To expedite handling of your order and delivery of the material, please list items in numerical and alphabetical sequence.

# SUPPL. CENTER SUPPLEMENT I. LMS

Items listed in Supply Center Stock Catalog Supplements are not shown in the Stock Catalog but are carried at the Supply Centers listed below to meet special requirements of agencies in their respective service areas. For descriptions of these items see the Stock Catalog Supplement of the Supply Center concerned.

Because of present market conditions it is impractical to establish firm prices for Class 56 items. For encumbrance purposes requisitioning agencies may refer to special price lists distributed by each Supply Center showing estimated issue prices as of the date of publication.

## SUPPL. CENTER SUPPLEMENT IT...AS

Items listed in Supply Center Stock Catalog Supplements are not shown in the Stock Catalog but are carried at the Supply Centers listed below to meet special requirements of agencies in their respective service areas. For descriptions of these items see the Stock Catalog Supplement of the Supply Center concerned.

Because of present market conditions it is impractical to establish firm prices for Class 56 items. For encumbrance purposes requisitioning agencies may refer to special price lists distributed by each Supply Center showing estimated issue prices as of the date of publication.

## FOREWORD

The Bureau of Federal Supply presents this illustrated stock catalog as another step in its constant effort to render a better supply service.

Standardized item descriptions are used, but to minimize different interpretations and to overcome the tendencies of some localities to identify certain items by different names, illustrations are used where deemed necessary for positive identification.

Items are listed in Federal Standard Stock Catalog sequence which in itself constitutes a ready working index, but an alphabetical index has also been provided as another easy-to-use and time-saving method for locating the desired items.

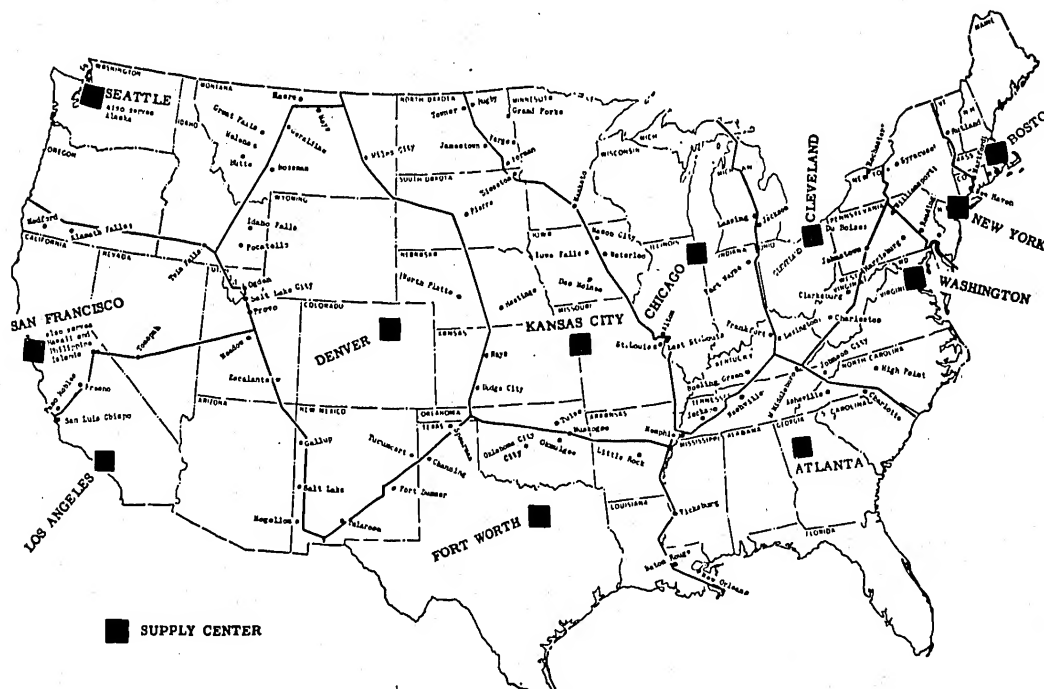

If further information is needed regarding the articles described in this catalog please communicate with the nearest Supply Center listed on page II.

Users of this catalog are invited to submit suggestions and criticism as a continuing means of improving the supply service through the benefits of experience.

TREASURY DEPARTMENT,  
BUREAU OF FEDERAL SUPPLY.

## SUPPLY CENTER SERVICE AREAS OF THE BUREAU OF FEDERAL SUPPLY

## **SPECIAL NOTICES**

### **CATALOG**

This catalog supersedes the Stock Catalog of July 1946 and all Supplements issued thereto. For additional copies of this catalog write to your nearest Supply Center or to the Office of the Deputy Director, Stores Branch, Bureau of Federal Supply, Treasury Department, Washington 25, D. C.

### **CATALOG PRICES**

Prices listed in this catalog are approximate national average prices and are shown for general price information only. These prices are subject to change without notice as they are averaged as deliveries of new stock are received for the dual purpose of equitably distributing the effects of price changes and maintaining the integrity of the capital fund. Price lists indicating current selling prices are issued quarterly by each supply center.

### **ILLUSTRATIONS**

Illustrations may be typical rather than exact representations, since the products of manufacturers vary somewhat in appearance.

### **TRADE NAMES**

References to trade names or brands are made solely to describe the general type of article listed and are not intended to restrict the merchandise to the particular make or brand listed in the catalog.

## INFORMATION AND GUIDE TO THE USE OF THE CATALOG

**I. LOCATION OF SUPPLY CENTERS.**—Supply Centers are strategically located throughout the United States to provide agencies the means of maintaining their stocks at a minimum and to provide a ready source to which all agencies may turn for assistance in procurement problems. Costs of handling and storage and other overlapping services are eliminated when agencies order direct from Supply Centers.

Supply Centers are located in ATLANTA, BOSTON, CHICAGO, CLEVELAND, DENVER, FORT WORTH, KANSAS CITY, LOS ANGELES, NEW YORK, SAN FRANCISCO, SEATTLE, and WASHINGTON, D. C.

**II. SERVICE AREAS.**—The service area map is presented principally to assist requisitioning agencies in selecting the shipping points which will result in the most economical transportation costs, and is not intended to restrict the agencies to such limits when other benefits outweigh the economy factors.

**III. FIRE-FIGHTING EQUIPMENT AND SCIENTIFIC GLASSWARE.**—Fire-fighting equipment is available from stock in San Francisco. Scientific glassware items are available from stocks in Denver, Chicago, and Washington. These specialized items are symbolized by asterisks (\*) with pertinent page footnotes.

**IV. SURPLUS PROPERTY.**—Each Supply Center acquires, stores, and issues surplus property of items listed in this catalog in accordance with the provisions of War Assets Administration Regulation 2 of November 28, 1945, and Bureau of Federal Supply Circular Letter B-28 of November 28, 1945, as currently revised. Agencies ordering from any of the Supply Centers of the Bureau of Federal Supply automatically comply with the Surplus Property Act of 1944, yet eliminate all problems incident to the procurement of surplus property. In short, any agency can meet its responsibilities for using Federal surplus insofar as items listed herein are concerned by ordering from the appropriate Supply Center. Unless requisitions or orders bear instructions to the contrary, they will be filled first from new surplus, second from suitable used surplus, and third from regular stock. Prices for surplus property are fixed by the disposal agency as the "fair value" of such property.

**V. QUARTERLY PRICE LISTS.**—Each supply center publishes and distributes a quarterly price list containing regional average prices which by reason of geographic locations are not necessarily the same as the general catalog prices. Ordering offices within each service area should consult the quarterly price list of the supply center within that area for encumbrance purposes. Additional copies of quarterly price lists may be obtained from the supply center serving the area or from the Office of the Deputy Director, Stores Branch, Bureau of Federal Supply, Treasury Department, Washington 25, D. C.

**VI. MISCELLANEOUS SUGGESTIONS AND INFORMATION.**—(a) Orders or requisitions for items listed herein and all inquiries relating thereto and all correspondence regarding stock items should be directed to the Stock Control Section at the pertinent address indicated in the Supply Center address on page II.

(b) Requisitions or orders for stock items and printed forms should be submitted in DUPLICATE. One copy will be used as a packing slip and sent to the consignee with the material. Supply Centers can render better service if the following essential information is correctly shown on each order:

(1) The complete title and General Accounting Office symbol numbers of appropriations to be charged. (This should not be confused with agency symbols, cost accounting, or budget objective classification numbers, etc.)

(2) The signature of an authorized officer of the requisitioning agency.

(3) Explicit shipping instructions to assure delivery to the proper destination. Shipment will always be made by the most economical mode of transportation unless otherwise requested by the ordering office by notation on the requisition. If the consignee's mailing address is not the same as the freight or express address on the requisition, please indicate the address to which bills of lading, back-order notices, cancellation notices, etc., should be sent. This can be accomplished by adding "Notify at \_\_\_\_\_"  
(Insert post-office address)

(c) To expedite service on orders for STOCK ITEMS please submit a separate requisition for each destination. Purchase authorities or purchase orders for PURCHASE OR CONTRACTUAL SERVICE may specify delivery to more than one destination on the same requisition.

(d) Indicate that appropriations cited are available for printing and binding purposes where requisitions include printing and binding items, e. g., notebooks, blank books, or standard forms.

(e) Please do not forward bills of lading with your requisitions. The Bureau of Federal Supply prefers to issue its own bills of lading chargeable to the appropriation shown on the order. If transportation costs are not chargeable to the appropriation cited for the material the requisition must include the appropriation for the transportation. In the absence of a specific billing address, the name of the department, bureau, or agency, and "Washington 25, D. C.," will be inserted in the space provided for that purpose on the bill of lading.

(f) Please list items in numerical and alphabetical order, double spaced, when preparing orders and requisitions. Use the exact stock number, but only the portion of the description which is essential to identify the item.

(g) Give special attention to the proper method of making entries under columns QUANTITY and UNIT on the requisition. The entry in the QUANTITY column multiplied by the entry in the UNIT column should equal the quantity of merchandise desired. For example:

	NUMBER OF UNITS	UNIT
Quantity desired: 100 cards		
- CORRECT ENTRY . . . . .	1	C
INCORRECT ENTRY . . . . .	100	C
Quantity desired: 12 pencils		
CORRECT ENTRY . . . . .	1	DOZEN
INCORRECT ENTRY . . . . .	12	DOZEN

Slight changes in quantities may be made when filling requisitions to permit issues in original containers unless the requisition specifically restricts the quantities to be furnished.

(h) Each requisition should clearly indicate whichever one of the following billing instructions is appropriate:

Bill by 991 voucher to (name and address of field fiscal office) or

Bill by transfer and counter warrant

Agencies which have field offices and whose detailed appropriation or fund accounts for these offices are maintained elsewhere than within the District of Columbia may elect to make direct payment through a Regional Disbursing Office as provided for in Bureau of Federal Supply Circular B-18 (revised November 4, 1946), thereby eliminating the necessity of having funds available in Washington for payment by transfer and counter warrant. The field fiscal office designated to be billed by the 991 series of vouchers must be the one which certifies and actually processes them for payment.

(i) *Receiving.*—Consignees should check Government bills of lading before delivery certificate is executed thereon. Insert the

address of the paying office (fiscal agent) in special charges to be billed to " " on both original and memo copies if the address is not already shown or indicated as "Washington, D. C.," where such indication is in error. No receipt is required by the Bureau of Federal Supply trucks or personnel.

To facilitate checking of deliveries by consignees, one copy of the agency's requisition or order will accompany each shipment and will be enclosed in one of the packages which will be plainly marked "Invoices in this package."

(j) *Loss or damage in transit.*—Items affected by freezing temperatures (such as ink, paste, and mucilage) will be shipped at the risk of the ordering office. If other merchandise is received in a damaged condition or if loss of any items invoiced is evident, the receiving office should make appropriate notation on the Government bill of lading, immediately notify the delivering carrier's agent at destination, and file claim according to governing procedure of the ordering agency. If it is necessary to write the Bureau of Federal Supply concerning the order involved in loss or damage claims, please refer to the INVOICE NUMBER which will be found on the packing slip or copy of the invoice enclosed.

(k) *Returned goods.*—In cases where the requisitioning office desires to return stock ordered in error, either in quantity or kind, or for any other reason, return authorization and shipping instructions must be requested and received from the Supply Center involved prior to return of the merchandise.

(l) *Inquiries as to delivery, services, etc.*—Inquiries and correspondence regarding pending or closed transactions should make reference to Bureau of Federal Supply INVOICE, ORDER, and STOCK NUMBERS.

(m) *Out-of-stock items.*—Every effort is made to maintain adequate stock of all items, however, at times it is necessary to back-order items pending receipt of stock on order. When items are back-ordered, consignees will be promptly notified and immediate

action will be taken to furnish the articles at the earliest practicable date unless market conditions require that procurement of such items be indefinitely postponed in which case the items will be canceled from the requisition and the agency notified accordingly.

(n) *Will-call service.*—Will-call service for stock items is available at all Supply Centers for the immediate withdrawal of items to bearers of properly executed requisitions when presented to the Stock Control Office at the address indicated for the Supply Centers on page II.

(o) *Purchase service.*—All Supply Centers will, upon request, contract for supplies and services furnished direct by vendors to Federal agencies. In addition to purchasing requirements of specific commodities, the Supply Center executes regional service contracts such as DRAYAGE, REPAIRING, PACKING, etc., for the general use of agencies in given regions or areas. Also, by special arrangement, each Supply Center stores and issues printed forms and special items of supply for the exclusive use of the agency applying for the service.

Complete details of this service may be secured upon application to the Chief of the Purchase and Supply Division at the addresses listed on page II.

Requisitions, orders, or purchase authorities for nonstock items or other service should be forwarded, in single copy only, to the Purchase and Stores Division of the Supply Centers at the addresses listed on page II.

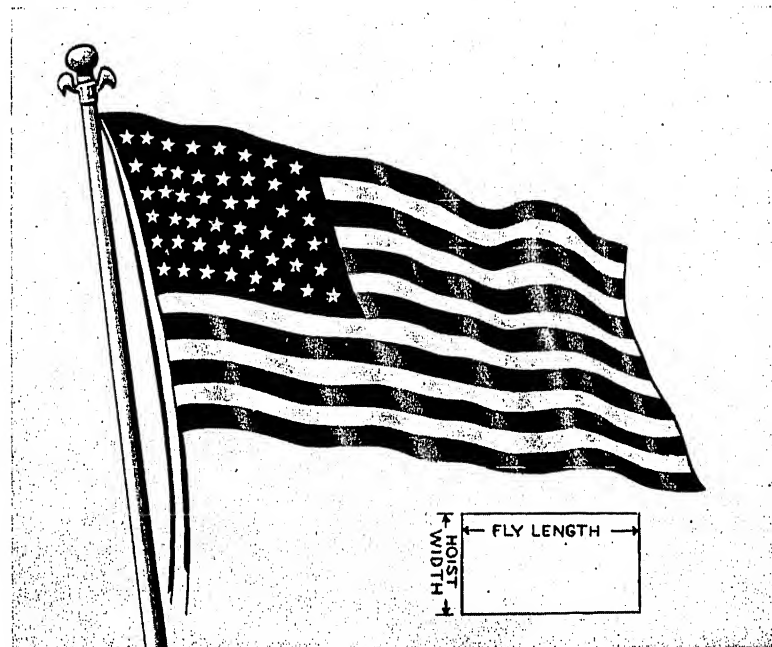

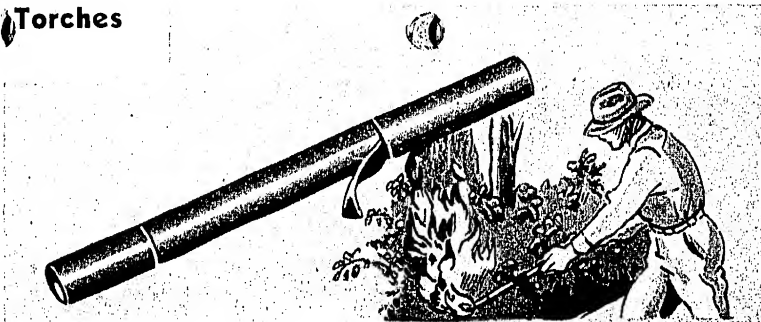

VII. *CLEARANCES.*—The Bureau of Federal Supply has complied with all regulations governing the purchase of items available from the Committee on Purchases of Blind-Made Products, Federal Prison Industries, Inc., Federal Supply Schedule contractors, Post Office Department and the Government Printing Office Envelope Schedules, and from surplus property. Ordering offices are not required to obtain clearance on items available from these sources when ordering direct from any Supply Center.

**RODS . . .**

Ground rods for telephone use. Steel; copper-covered; ½-inch diameter; 5 to 6 feet long. Exterior layer of copper is molten-welded to the steel core to assure dependability and long service. Rigid and easy to drive. Steel core provides necessary stiffness to permit driving rod into any type of soil. The top of the rod is chamfered to reduce spreading or "mushrooming" of the metal while it is being driven in. 10 to standard bundle.

**SLEEVES . . . Splicing**

Copper. Plain; single tube. For telephone and telegraph wires. Rolled type. Kearney type. Joints made with these sleeves have exceptional tensile strength, assuring a high factor of safety. Prevents line losses by maintaining a low-resistance joint; light weight of rod minimizes conductor fatigue. Use of the sleeve saves time, effort, and wire. Because of their smooth-finished surface and tapered ends, the sleeves may be pulled over cross arms and through stringing blocks without interference. 0.08081-inch size; for use with copper-covered steel wire; B & S No. 12. Length, 2½ inches; outside diameter of sleeve, ¾ inch.

## FOLDERS . . . File—Letter and legal size

It is a good practice to file no more than 100 papers to a folder. Reference is slowed up if more than 100 are placed in a folder. If you file fewer than five papers to a folder you can save space and cost of supplies by providing a folder for miscellaneous material. ♦ Consult the illustration

for the type of cut required for your operation and check the stock numbers and descriptions for the size and weight.

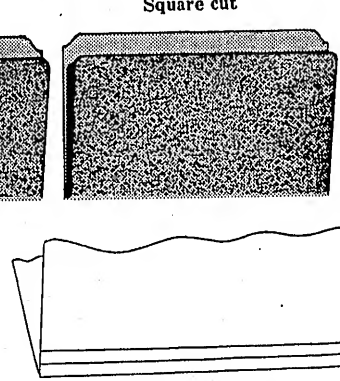

♦ Where applicable, each unit of issue will contain approximately the same number of each position, unless otherwise indicated in the description.

**MIMEOGRAPH PAPER . . .**

**NOTE.**—Groundwood mimeograph paper, 25 percent rag, substance 36, mimeograph paper, and wood-pulp (chemical) paper, substances 32 and 36, have been discontinued as standard stock items in all Supply Centers. These items were carried as wartime substitutes for better mimeograph papers because of War Production Board restrictions against the manufacture of heavier paper.

Mimeograph papers now stocked in all Supply Centers are substance 40, rag and wood-pulp (chemical), manufactured in accordance with current Federal Specifications. The heavier, more opaque paper permits two-side printing, therefore is more economical.

Grass shears (sheep-shear type). 12-inch length. Hand-operated. Made of high-grade steel, the shears are formed from a continuous piece of metal. Self-cleaning cutting edges of the tapered blades are ground and tempered. For cutting grass or weeds in hard-to-get-at places. Blades lie flat to the ground to permit close cutting or trimming. Patented feature prevents blades from jumping.

70-S-1038.....Pair 92¢

Pruning shears. Over-all length, 9 inches. Recommended for light pruning and cutting. Drop-forged steel handles are properly shaped for working comfort. 2½-inch forged-steel blades are bolted together. Strong volute steel spring spreads handles. When not in use, a thumb lock holds shears in closed position.

70-S-1060.....Pair \$1.61

STANDARD FORM NO. 64

*Office Memorandum* • UNITED STATES GOVERNMENT

TO : Management Officer

DATE: 1 September 1949

FROM : Assistant Director for Operations

SUBJECT: Comment on proposed revision of Administrative Instruction 

25X1A

1. This Office has no specific objection to the draft as written, but suggests consideration of the following points:

a. It is felt that the classification is too high. Whether or not the term "CIA" should be eliminated throughout is believed to be a matter for determination by Chief, Inspection and Security.

25X1A

c. The title is in part a misnomer, as procurement of "services" is not involved in the subject matter.
